

Huktra is conscious of the dangers caused by its activities and will take care in **every possible way** of the safety of the drivers, the public, customer personnel, the staff at terminals, the staff at cleaning stations and everyone else involved.

Each area where safety is at stake and where Huktra cannot expect that general human caution will avoid accidents, Huktra will issue **a specific safety procedure**, indicating the source of the risk and the required action to avoid any accident.

Incidents will be analyzed and necessary **corrective** and **preventive actions** will be taken.

Huktra encourages its staff members to actively think about safety issues and counts on it that staff members will give valuable ideas and **actively participate** in this debate.
